Examiner Interview

A telephone interview took place on November 29, 2006 between Examiner Manual Barbee and Emmanuel Rivera. The primary reference of U.S. Published Application 2004/0153772 to Gorshenev et al (Gorshenev) was discussed. Gorshenev is used by itself or in combination in rejecting the claims 1-48 in the Action. It was agreed that Gorshenev teaches that testing is performed both at the server and the client device or computing device; however, there is no teaching that testing is performed exclusively at the server. In other words, Gorshenev relies on some testing performed at the computing device.

The claims have been amended to specifically recite that the testing is exclusively performed or executed by the server computer. Examiner Barbee agreed that such amendments should overcome Gorshenev.

CONCLUSION

All pending claims 1-48 are in condition for allowance. Applicant respectfully requests reconsideration and prompt issuance of the subject application. If any issues remain that prevent issuance of this application, the Examiner is urged to contact the undersigned attorney before issuing a subsequent Action.

Respectfully Submitted,
